Kuala Lumpur, wilayah  
persekutuan

## OBJECTIVE

---

- Software Engineering Student at Universiti Kuala Lumpur MIIT, with a strong foundation in programming languages such as HTML, JavaScript, CSS, Python, PHP. I have hands-on experience in web development and database management using Codeigniter Framework and I'm passionate about developing real-world solutions. As a student at UNIKL MIIT, I am now actively seeking an entry level job to apply my skills, gain valuable experience, and further my learning in a professional environment. Known for being a quick learner and an effective team player, I am confident in my ability to contribute meaningfully while continuing to grow as a problem solver and developer.

## EDUCATIONAL BACKGROUND
